

这是一段 C# 代码。

```
public readonly record struct GpsTime: IFormattable, IEquatable<GpsTime>
{
    public readonly TimeSpan GpsTimeSpan;

    public readonly UtcTime UtcTimePoint
    {
        get
        {
            var utc = OriginalTimePoint + GpsTimeSpan;
            utc -= LeapSeconds.FindLeapSeconds(utc);
            return utc;
        }
    }
}
```
